

Reasons to choose Dolphin

Independence

Dolphin Mobility Ltd aims to stay totally independent in the supply of quality products in the disability market. This enables us to recommend the right equipment for each customer's needs without compromising on quality or safety.

No Pressure Sales

Pushy salesman selling unsuitable products are the blight of our industry. At Dolphin we will never try to rush you into making a decision. We will only sell you equipment that is suitable for the users condition.

Competitive Prices

We aim to keep our overhead low, allowing us to pass on our price benefits to all of our customers. The majority of our sales are generated through local authority grants and recommendations. We do not spend a significant amount of money on advertising, which is the largest overhead of many of our competitors.

Excellent Service

We give a 12 month guarantee on all of our products, both new and reconditioned. Cost effective maintenance contracts and extended warranties are available for further peace of mind. Our service charges are among the most competitive in the market and if you buy a product from us we will always maintain it for you.

Customer Satisfaction

We are proud of our work and strive to maintain a friendly "Customer First" philosophy from the moment you contact us. It is our intention to give first class service in all the stages of product supply. From your initial enquiry through to the installation and subsequent maintenance of the equipment, our staff will be friendly, conscientious, professional and polite.

Dolphin can also supply the following products:

Electric Lift & Rise Recliner Chairs

Swimming Pool Hoists

Hoists

Ceiling track hoists have become an indispensable aid to many disabled people's lives, allowing the user to be comfortably transferred in virtually any situation in the home.

There are several types of hoist system available depending on the requirements of the person and the construction of the property.

Recent breakthroughs in design and technology mean that bespoke track and hoist systems can be manufactured to support most properties.

Dolphin can supply a comprehensive range of portable hoists for use in a home care, nursing or institutional environment. Options include mobile floor lifts, wall mounted lifts and sit/stand lifts.

Bath Lifts

Bath Lifts are an excellent way to regain full use of your bathroom. If you have difficulty getting in or out of the bath then a Bath Lift from Dolphin could be the answer.

The bath lift is easily installed with four suction pads that cling to the bottom of the bath tub and is light weight and easy to manage.

On descending into the bath the lift automatically reclines, giving the user the luxury, of being able to lay down in the bath.

A simple press of a button will then return the user to the top of the bath. A swivel and slide option is available on some models to assist getting in and out of the bath.

If a bath lift is not suitable then Dolphin are able to provide alternative solutions such as a wall, floor or ceiling mounted hoisting system.

As always we deal with more than one manufacturer to ensure that we can supply the best product for the user's needs.

Stair Lifts

Dolphin Stairlifts are the leading independent supplier of stairlifts to both private individuals and local authorities.

Offering the choice of the best stairlifts available, we now have more local branches than any other stairlift company in the UK.

We greatly value our independence and take pride in our ability to recommend the most suitable stairlift for both the client and fitting location.

From the moment you first call you will receive friendly and impartial advice with no pressure selling.

We buy our stairlifts directly from companies such as Stannah, Minivator, Bison Bede and Freelifit.

As approved agents our staff are trained directly by the manufacturers as well as receiving comprehensive in-house training.

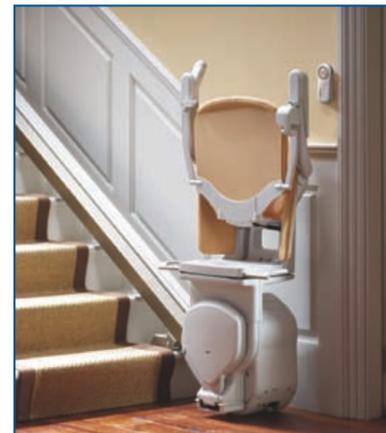

This means that our product knowledge and access to stairlifts and spare parts is second to none.

Reconditioned stairlifts are also available as a low cost alternative and we can also offer a relocation service. We usually have at least 100 reconditioned units in stock.

Call us free on **0800 9800 126** or visit the website at www.stairlift.co.uk for your free stairlift guide which includes impartial advice on:

- Choosing the right stairlift
- Buying Tips
- Where to try a stairlift
- Funding
- Useful Contacts

The stairlift guide is an invaluable resource for people looking to buy a stairlift, if you think that someone that you know could benefit, please get in touch with us and we will forward further copies accordingly.

Wheelchair Lifts

Wheelchair users and people with restricted mobility can benefit greatly from having a home lift installed.

Domestic Wheelchair Lifts can be installed in any downstairs room where the lift can travel vertically through an aperture in the ceiling to the room above.

When the lift is not in use it can be parked at either level leaving maximum living space available. The integral fire seal is effective when the lift is parked at the upper floor.

A domestic through floor lift is not suitable for use with a carer inside the cabin or for any standing users. In these circumstances an enclosed platform lift would be required.

A seated version is available and we can also supply a side hung unit if required. Platform sizes range from 590 x 790 mm to 790 x 1200 mm.

For more information call **0800 9800 126** or visit our website at www.dolphinlifts.co.uk

Step Lifts

Step Lifts have been developed as a relatively low cost option to give wheelchair users easy access where difficulties exist due to a change in level or the presence of steps.

Models are available to rise directly over one or two steps or to be installed alongside steps.

The lifts are compact whilst offering a large platform area and shallow ramp for easier access and can be installed either internally or externally.

Call stations and non slip flooring are standard features, other options include an interlocked safety gate at the upper level and a key control system to prevent unauthorised use.
